Project Summary

Objectives

The project aims at creating educational tools that will enable to prevent and combat gender-based violence (GBCV) by developing new skills, building the capacity of the partnering organization to work transnationally. The project intends to upgrade a set of the new ICT skills, and enable change at the individual and organizational level that will transform them into full-fledged entities being able to face the future challenges linked with the upcoming of new forms of GBCV.

Activities

The project implementation will be broken down into five work packages (WP) which will lead to producing the project's planned activities:

WP1: Preparing educational tools and increasing professional skills of the partnership staff members

WP2: Empowering communities and local stakeholders on gender-based cyber violence through pretesting and pilot actions

WP3: Preparing for mobilities and networking activities

WP4: Communication and dissemination actions

WP5: Project management.

Impact

The project expected deliverables will be as follows:

- 1) three training schemes for the staff members and professionals of the partnership on GBCV
- 2) a final publication
- 3) a pilot action supported by testing and report on how to run social awareness campaigns tackling gender-based cyber violence addressed to local stakeholders
- 4) a set of graphics and text materials on GBCV ready-to-used social media
- 5) a thematic seminar for 40 participants dedicated to ICT gender-based violence issues.
